ELPHINSTONE

UNDERGROUND RELIABILITY

ELIMINATES UNSAFE EXTRACTIONS

Use fit-for-purpose equipment during extractions

The Elphinstone Mine Extraction Device (MED) has been designed, manufactured and engineer certified with a pulling capacity of up to 360 Tonnes.

The Mine Extraction Device was invented in response to requests from underground miners having difficulties extracting buried equipment without damaging the mine or negatively impacting production.

The MED has performed hundreds of successful extractions at a number of underground mining operations (both coal and hard rock) across Australia and internationally.

Minimises disruptions to mining operations

Production disruptions are minimised by eliminating the need to deploy production equipment to assist in recoveries as well as minimising interactions with bogged or buried equipment.

The MED eliminates the need for traditional recovery methods that involve the use of other mobile equipment,

which reduces the hazards associated with personnel working around mobile equipment in close quarters and allows other mining operations to continue relatively uninterrupted.

What makes the MED so unique?

The Mine Extraction Device does not rely on traction like other systems. After the MED is towed into position and the boom is raised against the roof, the wheels are lowered on the floor. A bridle is interlocked onto the teeth of the MED racks. These MED racks are then pulled via hydraulic cylinders.

This is in contrast to using wheeled or tracked tow vehicles that can result in damage to the machines, the mine infrastructure, all of which can add further delays to the restart of production.

Insurance supports the proven MED system

The unique retrieval system has the support of numerous insurance companies with the recognition that if this system cannot retrieve a buried loader then the loader is not retrievable.

PULLER CAPABILITIES & SPECIFICATIONS

Three power-packed levels of pulling capacity

The Mine Extraction Device is available in 210-tonne, and 360-tonne capacities, developed in line with industry growth. (Older configurations still supported).

In addition to the retrieval of buried equipment, the higher capacity models are also capable of extracting drill rods embedded in the rock face.

Features Include:

- » Pulling capacity of up to 360 Tonnes.
- » The extendable boom allows use in a range of underground operations.
- » Easily towed into place.
- » Operating pressure [Max] 180 Bar, flow rate of 40-100 litres per minute.
- » Control pedestal and pilot valve.
- » Optional remote control.
- » Winch to assist rack positioning.
- » Cranes to assist positioning racks (MED360 only)

STANDARD AND OPTIONAL EQUIPMENT

● Standard ● Optional

Description	Qty	MED210	MED360
Arm Lift Ram Safety Lock	1		●
Base Machine	1	●	●
Boom Extension, 4m (13.1 ft)	1	●	
Boom Extension, 5m (16.4 ft)	1	●	
Boom Extension, 6m (19.6 ft)	1	●	●
Boom Extension, Adjustment Link	1		●
Connecting Link, D-shackle	1	●	●
Control Bank	1	●	●
Head Plate, Flat	1	●	●
Head Plate, Curved	1	●	●
Hose Storage Rack	1	●	●
Hydraulic Hoses, Machine to Control Bank	10m / 32ft 9.6in	●	●
Hydraulic Hoses, Control Bank to Power Pack	10m/ 32ft 9.6in	●	●
Hydraulic Power Pack	1	●	●
Hydraulic Winch	1	●	●
Rack, 1000 mm (39.4 in)	10	●	●
Rack, 2000 mm (78.7 in)	1		
Rack, Pin	10	●	●
Rack, Transport box	1	●	●
Rack, Lifting Tool	1	●

OVER 45 YEARS IN THE MINING INDUSTRY.

Elphinstone Pty Ltd is an established Caterpillar OEM Solutions customer with over 45 years' experience in the mining industry.

Elphinstone specialises in the design, manufacture and support of quality equipment for the global underground and surface mining industries.

The Elphinstone range of products combines practical design, the latest technology and quality manufacturing to ensure reliable performance.

The current product range includes specialised underground support vehicles, mine extraction devices, extended distance off-highway haulage trucks and water tanks customised to suit Caterpillar articulated trucks.

All Elphinstone products, technical assistance, support, and access to spare parts are available through the global Cat® dealer network with additional support from the Elphinstone regional sales and support team.
