

AVAILABLE S.O.S.SM SERVICES

UNDERSTANDING YOUR OIL

Our factory-trained technicians perform comprehensive fluid analysis on lubricated systems (engines, transmissions, hydraulics, final drives, differentials, gearboxes, compressors).

WE CAN SPOT:

- ✓ Early signs of damaging wear metals
- ✓ Condition of your oil
- ✓ Overall particle analysis
- ✓ Contaminants that hurt performance (water, fuel, glycol, dirt, etc.)

THE CASE FOR COOLANT

Every time you change your oil (or around every 500 hours), get a coolant test.

LEVEL 1

- ✓ Determines whether your coolant has the right chemical balance
- ✓ Maximum system protection and cooling efficiency
- ✓ Helpful for documenting routine maintenance

LEVEL 2

- ✓ Once per year
- ✓ Checks for issues like cavitation, corrosion or electrolysis that can go undetected

DON'T FORGET DIESEL FUEL

BASIC FUEL CHECK

- ✓ Monitor fuel for contamination
- ✓ Monitor sulfur and API

ALSO CHECK YOUR DIESEL EXHAUST FLUID

BASIC DIESEL EXHAUST FLUID ANALYSIS

- ✓ To ensure urea content is adequate
